Product manager with N years building software in regulated, high-stakes domains. I work hands-on with the product, from strategy through the evaluation and guardrails that keep it reliable in production. I shipped X that improved Y by Z%, and I own roadmaps end to end. Technical fluency in Python, SQL, and (your stack).

EXPERIENCE

Current Company – <i>Product Manager</i> ; City, ST	2024 – Present
• Led a cross-functional team that shipped X, improving Y by Z% against baseline • Built an evaluation framework (N test cases, holdback experiments) to validate the product before launch, and designed the guardrails that kept it compliant in production	
Prior Company – <i>Consultant</i> ; City, ST – Selected Experiences	2020 – 2024
<i>Flagship Initiative – Lead Product Manager</i>	
• Owned the roadmap and \$X budget for an initiative, sequencing deployments and allocating resources to hit quarterly objectives • Designed and delivered a system that automated a manual expert-review workflow, reducing turnaround time by Z%	
<i>Platform Consolidation – Product Manager</i>	
• Consolidated N legacy systems into one platform serving X users, streamlining core workflows and reducing operational overhead	
Earlier Company – <i>Research Associate</i> ; City, ST	2017 – 2020
• Designed the experiment, collected quantitative and qualitative data, and evaluated the hypothesis
